English

About

Born in 1998 and graduated from Sampad and now I'm studying software engineering at PNU of Mashhad. I have been familiar with programming logic and algorithms, since I was 13 years old.

I started web programming in 2014, worked as a freelancer, but in some ones, I had full-time or part-time team experience.

Mentoring and teaching, solving challenges and learning new topics are my favorite hobbies

Experiences

Mato digital marketing agency (2018)

Front developer, WordPress developer

Sikaj & Fatemi Hijab (2019)

WordPress developer, site support, optimization and reduce timeload.

Ghorbani Educational Institutions (2020)

Launch and customize BigBlueButton source, using api to manage it and sync with skyroom's api

i-Tech (2020)

Develop dedicated themes of WordPress (i-clean, i-roast, cartim24, ...)

Nutripors (2020)

Development of a start-up platform for the Ahwaz Medical Sciences Organization

Kaman Academy (2021)

Development of an interactive bourse platform, using Laravel as backend and Vue.js in front

Telefonchy (2021 until now)

Software support and development

And other freelance projects
